Chittari Prem Sai github.com/Chittaripremsai

EDUCATION

Anantha Lakshmi Institute of Technology and Sciences 2022 – 2026
Bachelor of Technology Ananthapuramu, India
Specialization: Artificial Intelligence and Machine Learning
CGPA: 7.9

SKILLS

Python

- **File Handling and Data Processing:** Experienced in reading, writing, and managing files using Python, including text, CSV, and JSON files.
- **Exception Handling and Debugging:** Knowledge of handling runtime errors using try, except, else, and finally blocks, along with debugging techniques to identify and resolve issues.
- **Modules and Packages:** Familiar with Python modules, packages, import statements, and reusable code organization to develop maintainable applications.
- **Database Connectivity:** Understanding of connecting Python applications to SQL databases such as MySQL and performing CRUD operations (Create, Read, Update, Delete).
- **API Integration:** Familiar with working with REST APIs, handling JSON responses, and integrating external services into Python applications.
- **Code Quality and Testing:** Understanding of code reusability, basic unit testing, and writing readable, maintainable Python code.

PROJECTS

A Deep Learning-Based Monument Identification System with AR Integration
Technologies: Python, TensorFlow, Keras, CNN, VGG16, OpenCV, Flask

- Developed a deep learning-based system to identify and classify Indian monuments using CNN and VGG16 transfer learning.
- Preprocessed and augmented an image dataset using resizing, rotation, zooming, shearing, and horizontal flipping to improve model generalization.
- Integrated a Flask API with the trained model to process uploaded monument images and return prediction results.
- Designed an Augmented Reality (AR) integration concept to provide historical information, monument visualizations, multimedia content, and map locations for an interactive learning experience.

Supermarket Management System using Python
This project is developed using QTdesigner and Python. Features an admin dashboard for monitoring and managing products, applying discounts, and tracking expenditures. Users can search for specific products, and admins can view order history.

CERTIFICATES

- Get Started with Python -Google
- Python Data Structures - University of Michigan
- Programming for Everybody (Getting Started with Pyhton) - University of Michigan

INTERNSHIPS

Software Development Engineer Intern , Bluestock Fintech 05/2025 – 06/2025
Assisted integration of REST APIs for data retrieval and transaction workflows.
Assisted team members with routine project coordination and follow-up activities
Gathered information from multiple sources to support research and reporting needs.
